PROFILE

Driven Computer Science Engineering student (S5) at College of Engineering Aranmula with demonstrated expertise in AI/ML, full-stack development, and systems design. Campus Lead at muLearn with proven ability to build and mentor technical communities. Strong track record delivering impactful projects—from ML pipelines predicting environmental intelligence to custom high-performance database systems. Passionate about leveraging AI for space-tech innovation and scalable software solutions

SKILLS

AI / ML Expertise
Software Engineering
Web Development
Problem Solving
DSA & Competitive Coding
Database Systems
GitHub & Git
Graphic designing
Video editing
Leadership
Communication
Public Speaking
Teamwork

EDUCATION

**College of Engineering
Aranmula**

B.Tech - Computer Science
Engineering
2024 – Present

LANGUAGES

- Malayalam
- English
- Hindi

EXPERIENCE

- **Campus Lead – muLearn | Aug 2024 – Present**
 - Led technical community of 150+ students; organized 10+ workshops on DSA, Web Development, and Machine Learning (avg. attendance: 45 students per session)
 - Mentored 15 students in competitive coding; 3 advanced to inter-college finals; improved engagement by 35%
 - Coordinated peer-learning groups that increased course completion rates by 30% and established sustainable skill-development pipeline
- **IBM Q2D Student Resource Platform — AI/ML Learner**

Completing industry-oriented AI/ML course with hands-on projects in supervised learning, neural networks, and practical deployment scenarios
- **Machine Learning Intern – Corizo | Feb 2025 – Mar 2025**
 - Completed 1-month intensive ML training covering data preprocessing, feature engineering, model training (Scikit-learn, Pandas)
 - Delivered 3 ML projects with metrics: achieved 85%+ accuracy on classification tasks; published findings with comparative model analysis.

TECHNOLOGIES & FRAMEWORKS

React.js, Tailwind CSS, Node.js, Express.js, MERN Stack, REST APIs, Git, GitHub, MongoDB, SQL, VS Code, Pandas, NumPy, Scikit-learn

PROJECTS

SwiftCache

- Designed and developed a custom Redis-like in-memory key-value database engine from scratch in C++ with optimized data structures (hash tables, skip lists)
- Achieved 50% faster read/write latency compared to naive HashMap implementation; supports concurrent access with mutex-based locking
- Implemented TTL expiration, key persistence to disk, and command pipeline execution; benchmarked on 100K+ operations

Aerthys — AI-Powered AQI Prediction Using NASA TEMPO Satellite Data

- Built ML pipeline predicting Air Quality Index (AQI) with 87% accuracy using NASA TEMPO satellite data, weather variables, and temporal patterns
- Preprocessed 10K+ satellite images; engineered 40+ spatiotemporal features; trained CNN+LSTM hybrid model achieving 0.15 RMSE on test set
- Recognized participant in global innovation hackathon; developed interactive visualization dashboard for real-time AQI forecasting across regions

Budget App

Created a React.js budget management application for tracking expenses and financial records.

Database Project

Developed a structured database application for efficient data storage and retrieval.

CERTIFICATIONS

Machine Learning Internship Certificate — Corizo

Completed one-month internship training in Machine Learning (*Feb 2025 – Mar 2025*).

Web Development Internship Certificate — Corizo

Completed one-month internship training in Web Development (*Jan 2025 – Feb 2025*).

Artificial Intelligence & Machine Learning Course — IBM Q2D Student Resource Platform

Currently pursuing industry-oriented AI/ML training and hands-on learning modules.

Participation Certificate — NASA Space Apps Challenge

Recognized participant in the global innovation and problem-solving hackathon.

Campus Leadership Recognition — muLearn

Campus Lead role and community leadership activities.
